Professional Summary

Full-Stack Engineer with 2+ years of experience delivering end-to-end software solutions across ERP, education, healthcare, logistics, HR, legal, real estate, and marine marketplace domains. Own the complete product lifecycle—from client discovery and requirements gathering to architecture design, development, testing, deployment, and post-launch support. Experienced in building scalable web and mobile platforms using Laravel, Node.js, Vue.js, React, Flutter, MongoDB, MySQL, and Redis. Skilled in system design, REST APIs, real-time systems, payment integrations, cloud infrastructure, and CI/CD pipelines. Delivered production-ready solutions as a sole developer, collaborating directly with stakeholders to transform business requirements into scalable applications.

Core Responsibilities

- Client requirements gathering and business analysis
- Solution architecture and technical planning
- Database design and REST API development
- Frontend, backend, and mobile API implementation
- Third-party integrations and payment workflows
- Testing, quality assurance, and performance optimization
- Cloud deployment, CI/CD, and infrastructure management
- Production monitoring, maintenance, and support

Professional Experience

Al Arabia Cinema — Full-Stack Engineer / Project Manager

Sep 2025 – Present

- Lead architecture, development, deployment, and maintenance of ERP platforms using Laravel, Vue.js, MongoDB, and Redis.
- Manage project planning, CI/CD pipelines, testing, infrastructure, and production environments.
- Coordinate directly with stakeholders to translate business requirements into scalable software solutions.

Triple Agency — Full-Stack Engineer

Jul 2025 – Jan 2026

- Designed and delivered healthcare, logistics, referral, and competition platforms.
- Built scalable REST APIs, real-time features, and third-party integrations across multiple industries.

Freelance — Independent Software Consultant & Full-Stack Engineer

Jul 2025 – Jan 2026

- Led the complete software delivery lifecycle for custom client projects from requirements gathering to production deployment.
- Acted as sole developer responsible for architecture, development, testing, deployment, and maintenance.
- Collaborated directly with clients to define business requirements, technical roadmaps, and product workflows.

Harvest British College — Software Developer

Jul 2024 – Jun 2025

- Built CRM, operations, finance, and HR modules using Laravel and Blade for a live education institution platform.
- Developed REST APIs supporting mobile applications and automated internal workflows.
- Delivered customer and instructor portals plus bilingual public website at harvestcollege.co.uk.

Selected Projects

BoatBnB + ERP — Multi-Platform Boat Rental Marketplace & Operations System

Freelance | Sole Developer | Jul 2025 – Jan 2026

Sole developer responsible for business analysis, architecture, frontend, backend, infrastructure, testing, deployment, and maintenance.

- Architected and delivered a Laravel 12 monorepo combining a boat rental marketplace and a back-office ERP system.

- Owned the complete product lifecycle independently, including requirements gathering, solution architecture, development, testing, deployment, and post-launch support.
- Built and maintained separate applications for customers, service providers, guests, agencies, and administrators.
- Developed REST APIs for boat discovery, bookings, availability management, provider onboarding, payouts, referrals, moderation workflows, and ERP operations.
- Implemented real-time messaging and calling features using the Agora SDK.
- Integrated Stripe payments for bookings, commissions, payouts, and secure transaction processing.
- Developed GPS-based boat tracking and location services.
- Delivered multilingual support across 10 languages with full localization workflows.
- Integrated AWS S3 for media storage, OAuth authentication, WhatsApp OTP verification, and Redis caching.
- Designed role-based access control and scalable workflows for multi-role business operations.

Tech Stack: Laravel 12, PHP 8.2, Vue.js 3, MySQL, MongoDB, Redis, Sanctum, Socialite, Stripe, AWS S3, Agora SDK, Firebase, Docker, Nginx.

Harvest British College (SYS) — Education ERP & CRM

Software Developer | Jul 2024 – Jun 2025 | Live: harvestcollege.co.uk

Sole developer responsible for business analysis, architecture, frontend, backend, infrastructure, testing, deployment, and maintenance.

- Built modular Laravel education ERP with CRM lead pipeline, class/group management, payments, and multi-portal access.
- Delivered admin ERP, customer portal, instructor portal, and bilingual public website deployed in production.
- Implemented 20+ operational reports, Spatie RBAC, Livewire admin components, and Twilio SMS integration.

Tech Stack: Laravel 10, Livewire, MySQL, nwidart Modules, Spatie Permission, Twilio, JWT, Sanctum.

Portfolio: abdelrahman1203.github.io/project.html?id=10-harvest-british-college | GitHub: github.com/Abdelrahman1203/harvest-british-college

BlackHorse — B2B Wholesale & Delivery Platform

Built 240+ REST API endpoints powering a logistics platform for supermarkets, suppliers, and drivers with real-time order tracking, group purchasing, store accounting, and Socket.IO chat.

ERP Arabia — Warehouse & Inventory ERP

Developed a multi-branch warehouse ERP with purchase workflows, stock adjustments, inter-warehouse transfers, bilingual EN/AR support, and 10+ exportable reports.

Estshary — Healthcare Platform

Implemented appointment workflows, AI-powered doctor recommendations using OpenAI APIs, OCR processing, Firebase notifications, and mobile APIs.

HR Management System

Engineered a payroll and attendance platform with ZKTeco biometric integration, configurable deduction rules, and automated payroll exports.

Education

Bachelor of Computer Science — October 6 University

Graduated: July 2021

Graduation Project: Smart Public Garage integrating Arduino NodeMCU, ultrasonic sensors, online reservations, and secure payment workflows.

Technical Skills

Languages: PHP, JavaScript, TypeScript, SQL

Frameworks & Libraries: Laravel, Node.js, Express.js, Vue.js, React, Flutter, Blade, Tailwind CSS, Bootstrap, Alpine.js

Databases & Caching: MySQL, MongoDB, Redis

Real-Time: Socket.IO, Agora SDK, WebSockets, Firebase Cloud Messaging

DevOps & Cloud: Docker, Linux, Nginx, CI/CD, AWS S3, PM2, Supervisor, VPS Management

Architecture: REST APIs, RBAC, SOLID Principles, Clean Architecture, System Design, Event-Driven Systems, Multi-Tenant Systems

Integrations: Stripe, Fawaterak, OpenAI API, Twilio, BeonSMS, Cloudinary, SendGrid, Tesseract OCR

Testing & Tools: Postman, Git, GitHub, PHPUnit, Jest, Vitest, Playwright

Languages

Arabic — Native

English — Professional Working Proficiency
